Principal Arguments and Other Matters

Applicant's representative proposed amending the claim to positively recite that the implant is a dental implant and includes threads with an anatase layer. Applicant argued that Blanquaert did not disclose a dental implant and that it would not be obvious to apply the coating of Blanquaert to a dental implant because of the difficulties of forming anatase on a small implant.

Results of Interview

The Examiner agreed to reconsider the present application upon presentation of amendments and arguments in a written response.
